

WHAT'S HOT

Looking for what's hot in the denim fashion world?

Tune in here regularly for all the latest updates and news straight from the street.

THIS WINTER'S COOLEST LOOK IS...HOT!

Skinny jeans and boots are a winter favorite. This winter sees the classic look continue with a sexy edge with super dark denim with a super skinny leg profile.

Our best example of this super sexy look starts with the [Pearl Super Skinny](#).

This is the MUST have jean for winter. With the skinny leg profile you don't need to tuck this jean into your boots, they'll glide on all by themselves!

The dark indigo denim and super skinny leg profile combination creates a smooth slimming silhouette giving you the foundation to create a hot look for winter.

Look for little features that add up to a really hot look like 'fake' front pockets. Like the dreaded 'panty line' on the back, pockets on the front can create extra lumps and bumps no girl wants. With these fake pockets your thighs will be looking ultra smooth.

And of course, we've thought of it all and don't want your exit to fall flat... The back pockets of Pearl Super Skinny have been especially designed and positioned in such a way that they create a 'Butt Lifting' effect. You'll swear your butt is defying gravity!

Teamed up with a sleek sexy boot it's the perfect going out look for winter nights.

Heading out for coffee or the flicks with friends? Get comfy and classic with a tall flat heeled boot.
